## Long-Term Capital Appreciation

Davis Opportunity Fund is a portfolio with the flexibility to seek attractive businesses across all market caps, industries and sectors, predominantly in the U.S. Using the time-tested Davis Investment Discipline, the Fund has outperformed its benchmark since we began daily active management.<sup>1</sup> The Fund has lower than average expenses.<sup>2</sup> As the largest shareholder, we have a unique commitment to client stewardship.

### ► Why Invest in Davis Opportunity Fund

- **Equity-Focused Research Firm:** Established in 1969, Davis is a leading specialist in equity investing. Our primary focus on equity research and unique investment discipline has built wealth for our clients over the long term.
- **Portfolio of Best of Breed Businesses:** The Fund can opportunistically invest in businesses across all market caps, industries and sectors, predominantly in the U.S. Utilizing rigorous independent research, we invest in durable, well-managed businesses with sustainable competitive advantages and attractive long-term growth prospects selling at a discount to their true value.
- **Attractive Results:** The Fund has outperformed the Russell 3000 Index since we began daily active management on January 1, 1999.<sup>1</sup>
- **Flexible, Opportunistic Approach:** We believe a bottom-up stock selection process and not mirroring the benchmark index are keys to long-term outperformance.
- **We Are the Largest Shareholder:** We have a unique commitment to stewardship, generating attractive long-term results, managing risks, and minimizing fees.

The average annual total returns for Davis Opportunity Fund's Class A shares for periods ending December 31, 2017, including a maximum 4.75% sales charge, are: 1 year, 17.25%; 5 years, 16.66%; and 10 years, 7.85%. The performance presented represents past performance and is not a guarantee of future results. Total return assumes reinvestment of dividends and capital gain distributions. Investment return and principal value will vary so that, when redeemed, an investor's shares may be worth more or less than their original cost. The total annual operating expense ratio may vary in future years. Returns and expenses for other classes of shares will vary. Current performance may be higher or lower than the performance quoted. For most recent month-end performance, visit [davisfunds.com](http://davisfunds.com) or call 800-279-0279. The Fund's performance benefited from IPOs purchased in 2013 and 2014. After purchase, the IPOs rapidly increased in value. Davis Advisors purchases shares intending to benefit from long-term growth of the underlying company; the rapid appreciation of the IPOs was an unusual occurrence.

The Morningstar rating/number of funds is provided as of December 31, 2017: three years, 4 stars/1216; five years, 4 stars/1109; 10 years, 3 stars/787. Class A shares. Past performance is not a guarantee of future results.

Davis Advisors began active daily management of the Davis Opportunity Fund on January 1, 1999. From May 1, 1984 until December 31, 1998, Davis Advisors had a subadvisor that handled the active daily management of the Fund.

The Fund generally uses Global Industry Classification Standard ("GICS") as developed by Morgan Stanley Capital International and Standard & Poor's Corporation to determine industry classification. GICS presents industry classification as a series of levels (i.e. sector, industry group, industry, and sub-industry). Allocations shown are at the Industry Group level except for the following industry groups which have been combined as indicated: Information Technology: Software & Services, Technology Hardware & Equipment, Semiconductors & Semiconductor Equipment; Health Care: Pharmaceuticals, Biotechnology & Life Sciences, Health Care Equipment & Services. The Advisor may reclassify a company into an entirely different industry if it believes that the GICS classification for a specific company does not accurately describe the company. Industry Group weightings are subject to change.

**Objective and Risks.** Davis Opportunity Fund's investment objective is long-term growth of capital. There can be no assurance that the Fund will achieve its objective. Some important risks of an investment in the Fund are: **common stock risk:** an adverse event may have a negative impact on a company and could result in a decline in the price of its common stock; **depository receipts risk:** depository receipts may trade at a discount (or premium) to the underlying security and may be less liquid than the underlying securities listed on an exchange; **emerging market risk:** securities of issuers in emerging and developing markets may present risks not found in more mature markets; **fees and expenses risk:** the Fund may not earn enough through income and capital appreciation to offset the operating expenses of the Fund; **foreign country risk:** foreign companies may be subject to greater risk as foreign economies may not be as

strong or diversified. As of December 31, 2017, the Fund had approximately 21.2% of assets invested in foreign companies; **foreign currency risk:** the change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency; **headline risk:** the Fund may invest in a company when the company becomes the center of controversy. The company's stock may never recover or may become worthless; **large-capitalization companies risk:** companies with \$10 billion or more in market capitalization generally experience slower rates of growth in earnings per share than do mid- and small-capitalization companies; **manager risk:** poor security selection may cause the Fund to underperform relevant benchmarks; **mid- and small-capitalization companies risk:** companies with less than \$10 billion in market capitalization typically have more limited product lines, markets and financial resources than larger companies, and may trade less frequently and in more limited volume; and **stock market risk:** stock markets have periods of rising prices and periods of falling prices, including sharp declines. See the prospectus for a complete description of the principal risks.

**Multi-Cap Core** funds invest in a variety of market capitalization ranges without concentrating 75% of their equity assets in any one market capitalization range over an extended period of time. Multi-Cap Core funds typically have average characteristics compared to the S&P SuperComposite 1500 Index.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar risk-adjusted return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

The Russell 3000 Index measures the performance of the 3,000 largest companies incorporated in the United States and its territories and listed on the NYSE, AMEX, or NASDAQ. The companies are ranked by decreased total market capitalizations. Investments cannot be made directly in an index.

After April 30, 2018, this material must be accompanied by a supplement containing performance data for the most recent quarter end.
