SUMMARY PROSPECTUS

November 29, 2023

Before you invest, you may want to review Davis New York Venture Fund's [statutory prospectus](#) and [statement of additional information](#), which contain more information about the Fund and its risks. You can find the Fund's statutory prospectus and other information about the Fund, at no cost, online at <https://davisfunds.com/resources/prospectuses-forms>, by calling 1-800-279-0279, or by sending an e-mail request to dvsinvestor.services@dsaco.com. The current prospectus and statement of additional information, dated November 29, 2023, as may be further amended or supplemented are incorporated by reference into this summary prospectus and may be obtained, free of charge, in the same manner as the statutory prospectus. The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

Investment Objective

The Fund seeks long-term growth of capital.

Fees and Expenses of the Fund

These tables describe the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below. You may qualify for sales charge discounts with respect to Class A shares if you and your family invest, or agree to invest in the future, at least \$100,000 in Davis Funds. More information about these and other discounts is available from your financial intermediary and in "How to Choose a Share Class" on page 19 of the Fund's prospectus and "Selecting the Appropriate Class of Shares" on page 34 of the Fund's statement of additional information. In addition, descriptions of the sales load waivers and/or discounts for Class A shares with respect to certain financial intermediaries are reproduced in "Appendix A: Intermediary-Specific Sales Charge Waivers and Discounts" to the prospectus based on information provided by the financial intermediary.

Shareholder Fees (fees paid directly from your investment)	Class A shares	Class B shares	Class C shares	Class R shares	Class Y shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	4.75%	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lesser of the net asset value of the shares redeemed or the total cost of such shares)	0.50%*	4.00%	1.00%	None	None
Redemption Fee (as a percentage of total redemption proceeds)	None	None	None	None	None

* Only applies if you buy shares valued at \$1 million or more without a sales charge and sell the shares within one year of purchase.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Class A shares	Class B shares	Class C shares	Class R shares	Class Y shares
Management Fees	0.54%	0.54%	0.54%	0.54%	0.54%
Distribution and/or Service (12b-1) Fees	0.23%	1.00%	1.00%	0.48%	0.00%
Other Expenses	0.15%	0.73%	0.21%	0.17%	0.13%
Total Annual Operating Expenses	0.92%	2.27%	1.75%	1.19%	0.67%
Less Fee Waiver or Expense Reimbursement*	0.00%	-0.52%	0.00%	0.00%	0.00%
Net Expenses	0.92%	1.75%	1.75%	1.19%	0.67%

* The Adviser is contractually committed to waive fees and/or reimburse the Fund's expenses to the extent necessary to cap total annual fund operating expenses (Class A shares, 1.00%; Class B shares, 1.75%; Class C shares, 1.75%; Class R shares, 1.25%; and Class Y shares, 0.75%). The Adviser is obligated to continue the expense cap through December 1, 2024. The expense cap cannot be modified prior to this date without the consent of the Board of Directors. After that date, there is no assurance that the Adviser will continue to cap expenses. The Adviser may not recoup any of the operating expenses it has reimbursed to the Fund.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

If you redeem your shares in: If you did not redeem your shares in:

1 Year 3 Years 5 Years 10 Years 1 Year 3 Years 5 Years 10 Years

Class A shares	\$564	\$754	\$960	\$1,553	\$564	\$754	\$960	\$1,553
Class B shares	578	959	1,368	2,060	178	659	1,168	2,060

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 7% of the average value of its portfolio.

Principal Investment Strategies

Davis Selected Advisers, L.P. (“Davis Advisors” or the “Adviser”), the Fund’s investment adviser, uses the Davis Investment Discipline to invest the Fund’s portfolio principally in common stocks (including indirect holdings of common stock through Depositary Receipts, as defined below) issued by large companies with market capitalizations of at least \$10 billion. Historically, the Fund has invested a significant portion of its assets in financial services companies and in foreign companies, and may also invest in mid- and small-capitalization companies.

Davis Investment Discipline. Davis Advisors manages equity funds using the Davis Investment Discipline. Davis Advisors conducts extensive research to try to identify businesses that possess characteristics that Davis Advisors believes foster the creation of long-term value, such as proven management, a durable franchise and business model, and sustainable competitive advantages. Davis Advisors aims to invest in such businesses when they are trading at discounts to their intrinsic worth. Davis Advisors emphasizes individual stock selection and believes that the ability to evaluate management is critical. Davis Advisors routinely visits managers at their places of business in order to gain insight into the relative value of different businesses. Such research, however rigorous, involves predictions and forecasts that are inherently uncertain. After determining which companies Davis Advisors believes the Fund should own, Davis Advisors then turns its analysis to determining the intrinsic value of those companies’ equity securities. Davis Advisors seeks companies whose equity securities can be purchased at a discount from Davis Advisors’ estimate of the company’s intrinsic value based upon fundamental analysis of cash flows, assets and liabilities, and other criteria that Davis Advisors deems to be material on a company-by-company basis. Davis Advisors’ goal is to invest in companies for the long term (ideally, five years or longer, although this goal may not be met). Davis Advisors considers selling a company’s equity securities if the securities’ market price exceeds Davis Advisors’ estimates of intrinsic value, if the ratio of the risks and rewards of continuing to own the company’s equity securities is no longer attractive, to raise cash to purchase a more attractive investment opportunity, to satisfy net redemptions, or for other purposes.

Principal Risks of Investing in Davis New York Venture Fund

You may lose money by investing in the Fund. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value.

The principal risks of investing in the Fund are:

Stock Market Risk. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices, including the possibility of sharp declines.

Common Stock Risk. Common stock represents an ownership position in a company. An adverse event may have a negative impact on a company and could result in a decline in the price of its common stock. Common stock is generally subordinate to an issuer’s other securities, including preferred, convertible, and debt securities.

Financial Services Risk. Risks of investing in the financial services sector include: (1) systemic risk: factors outside the control of a particular financial institution may adversely affect the ability of the financial institution to operate normally or may impair its financial condition; (2) regulatory actions: financial services companies may suffer setbacks if regulators change the rules under which they operate; (3) changes in interest rates: unstable and/or rising interest rates may have a disproportionate effect on companies in the financial services sector; (4) non-diversified loan portfolios: financial services companies may have concentrated portfolios that makes them vulnerable to economic conditions that affect an industry; (5) credit: financial services companies may have exposure to investments or agreements that may lead to losses; and (6) competition: the financial services sector has become increasingly competitive.

Foreign Country Risk. Securities of foreign companies (including Depositary Receipts) may be subject to greater risk as foreign economies may not be as strong or diversified, foreign political systems may not be as stable, and foreign financial reporting standards may not be as rigorous as they are in the United States. There may also be less information publicly available regarding the non-U.S. issuers and their securities. These securities may be less liquid (and, in some cases, may be illiquid) and could be harder to value than more liquid securities.

China Risk – Generally. Investment in Chinese securities may subject the Fund to risks that are specific to China. China may be subject to significant amounts of instability, including, but not limited to, economic, political, and social instability. China’s economy may differ from the U.S. economy in certain respects, including, but not limited to, general development, level of government involvement, wealth distribution, and structure.

The Fund may invest in securities issued by variable interest entities (“VIEs”), which are subject to the investment risks associated with the underlying Chinese operating company. A VIE enters into service contracts and other contracts with the Chinese operating company, which provide the VIE with exposure to the company. Although the VIE has no equity ownership of the Chinese operating company, the contractual arrangements permit the VIE to consolidate the Chinese operating company into its financial statements. Intervention by the Chinese government with respect to VIEs could significantly affect the Chinese operating company’s performance and the enforceability of the VIE’s contractual arrangements with the Chinese company.

Headline Risk. The Fund may invest in a company when the company becomes the center of controversy after receiving adverse media attention concerning its operations, long-term prospects, management, or for other reasons. While Davis Advisors researches companies subject to such contingencies, it cannot be correct every time, and the company’s stock may never recover or may become worthless.

Large-Capitalization Companies Risk. Companies with \$10 billion or more in market capitalization are considered by the Adviser to be large-capitalization companies. Large-capitalization companies generally experience slower rates of growth in earnings per share than do mid- and small-capitalization companies.

Manager Risk. Poor security selection or focus on securities in a particular sector, category, or group of companies may cause the Fund to underperform relevant benchmarks or other funds with a similar investment objective. Even if the Adviser implements the intended investment strategies, the implementation of the strategies may be unsuccessful in achieving the Fund’s investment objective.

Depository Receipts Risk. American Depositary Receipts, European Depositary Receipts, and Global Depositary Receipts (“Depository Receipts”) are certificates evidencing ownership of shares of a foreign issuer. Depository Receipts are subject to many of the risks associated with investing directly in foreign securities. Depository Receipts may trade at a discount, or a premium, to the underlying security and may be less liquid than the underlying securities listed on an exchange.

Emerging Market Risk. Securities of issuers in emerging and developing markets may offer special investment opportunities, but present risks relating to political, economic, or regulatory conditions not found in more mature markets, such as government controls on foreign investments, government restrictions on the transfer of securities, and less developed trading markets, exchanges, reporting standards, and legal and accounting systems.

Fees and Expenses Risk. The Fund may not earn enough through income and capital appreciation to offset the operating expenses of the Fund. All mutual funds incur operating fees and expenses. Fees and expenses reduce the return that a shareholder may earn by investing in a fund, even when a fund has favorable performance. A low-return environment, or a bear market, increases the risk that a shareholder may lose money.

Foreign Currency Risk. The change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency. For example, when the Fund holds a security that is denominated in a foreign currency, a decline of that foreign currency against the U.S. dollar would generally cause the value of the Fund’s shares to decline.

Mid- and Small-Capitalization Companies Risk. Companies with less than \$10 billion in market capitalization are considered by the Adviser to be mid- or small-capitalization companies. Mid- and small-capitalization companies typically have more limited product lines, markets, and financial resources than larger companies and their securities may trade less frequently and in more limited volume than those of larger, more mature companies.

Your investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency, entity or person.

Performance Results

The bar chart below provides some indication of the risks of investing in the Fund by showing how the Fund’s investment results have varied from year to year. The following table shows how the Fund’s average annual total returns, for the periods indicated, compare with those of the S&P 500 Index, a broad-based securities market index. The Fund’s past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Updated information on the Fund’s results can be obtained by visiting www.davisfunds.com or by calling 1-800-279-0279.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown, and after-tax returns shown are not relevant to investors who hold their Fund shares through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. After-tax returns are shown only for Class A shares; after-tax returns for other share classes will vary.
