

# Selective. Attractive Growth. Undervalued.

“What gives us confidence that our Funds will build wealth for our shareholders in the years and decades to come? The compelling attributes of our businesses.

By being highly selective and rejecting the vast majority of companies in the index, we’ve built portfolios in which the gap between price and value is among the widest we have ever seen. We believe this sets the stage for attractive returns in the years ahead.”

Chris Davis, Portfolio Manager

	Selective Holdings	Attractive Growth EPS Growth (5 Year) <sup>1</sup>	Undervalued P/E (Forward) <sup>2</sup>

Please read the prospectus or summary prospectus carefully before investing or sending money. Investing involves risks including possible loss of principal.*

1. Five-year EPS Growth Rate (5-year EPS) is the average annualized earnings per share growth for a company over the past 5 years. The values shown are the weighted average of the 5-year EPS of the stocks in the Fund. Not all assets of the Funds and Portfolios are accounted for in the calculation of 5-year EPS as relevant information on certain companies is not available to the Advisor's data provider. Approximate amounts are: DNYVF: 6.04%; DIF: 19.55%; DGF: 17.30%; DFF: 7.49%; DOF: 9.91%. The 5-year EPS of the S&P 500 is 17.7%. The 5-year EPS of the MSCI ACWI ex US is 12.3%. The 5-year EPS of the MSCI ACWI is 16.6%. The 5-year EPS of the S&P 500 Financials is 14.0%. The 5-year EPS of the S&P 1500 is 17.6%.

2. Forward Price/Earnings (Forward P/E) Ratio is a stock's current price divided by the company's forecasted earnings for the following 12 months. The values for the portfolio are the weighted average of the P/E ratios of the stocks in the portfolio. The Forward P/E of the S&P 500 is 24.9%. The Forward P/E of the MSCI ACWI ex US is 14.7%. The Forward P/E of the MSCI ACWI is 20.4%. The Forward P/E of the S&P 500 Financials is 17.6%. The Forward P/E of the S&P 1500 is 24.3%.

**Objective and Risks.** The investment objective of Davis New York Venture Fund, Davis Global Fund, Davis International Fund, Davis Opportunity Fund, and Davis Financial Fund is long-term growth of capital. There can be no assurance that a Fund will achieve its objective. Some important risks of an investment in the Funds are: **China risk – generally (DNYVF, DGF & DIF):** investment in Chinese securities may subject the Fund to risks that are specific to China including, but not limited to, general development, level of government involvement, wealth distribution, and structure; **common stock risk:** an adverse event may have a negative impact on a company and could result in a decline in the price of its common stock; **credit risk (DFF):** The issuer of a fixed income security (potentially even the U.S. Government) may be unable to make timely payments of interest and principal; **depository receipts risk:** depository receipts involve higher expenses and may trade at a discount (or premium) to the underlying security and may be less liquid than the underlying securities listed on an exchange; **emerging market risk:** securities of issuers in emerging and developing markets may present risks not found in more mature markets; as of 12/31/24, DGF had approximately 30.7% of net assets invested in securities from emerging markets; as of 12/31/24, DIF had approximately 50.8% of net assets invested in securities from emerging markets; **exposure to industry or sector risk (DGF & DIF):** significant exposure to a particular industry or sector may cause the Fund to be more impacted by risks relating to and developments affecting the industry or sector; **fees and expenses risk:** the Fund may not earn enough through income and capital appreciation to offset the operating expenses of the Fund; **financial services risk (DNYVF & DFF):** investing a significant portion of assets in the financial services sector may cause the Fund to be more sensitive to problems affecting

financial companies; **focused portfolio risk (DFF):** investing in a limited number of companies causes changes in the value of a single security to have a more significant effect on the value of the Fund's total portfolio; **foreign country risk:** foreign companies may be subject to greater risk as foreign economies may not be as strong or diversified; as of 12/31/24, DNYVF had approximately 21.8% of net assets invested in foreign companies; as of 12/31/24, DOF had approximately 19.8% of net assets invested in foreign companies; as of 12/31/24, DFF had approximately 17.9% of net assets invested in foreign companies; **foreign currency risk:** the change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency; **headline risk:** the Fund may invest in a company when the company becomes the center of controversy. The company's stock may never recover or may become worthless; **interest rate sensitivity risk (DFF):** interest rates may have a powerful influence on the earnings of financial institutions; **large-capitalization companies risk:** companies with \$10 billion or more (\$18 billion or more for DOF) in market capitalization generally experience slower rates of growth in earnings per share than do mid- and small-capitalization companies; **manager risk:** poor security selection may cause the Fund to underperform relevant benchmarks; **mid- and small-capitalization companies risk:** companies with less than \$10 billion (less than \$18 billion for DOF) in market capitalization typically have more limited product lines, markets and financial resources than larger companies, and may trade less frequently and in more limited volume; **shareholder concentration risk (DIF):** from time to time, a relatively large percentage (over 20%) of the Fund's shares may be held by related shareholders. A large redemption by one or more of such shareholders may reduce the Fund's liquidity, may increase the Fund's transactions and transaction costs, may result in substantial capital gains distributions for

shareholders, and may increase the Fund's ongoing operating expenses, which could negatively impact the remaining shareholders of the Fund. **stock market risk:** stock markets have periods of rising prices and periods of falling prices, including sharp declines; See the prospectus for a complete description of the principal risks.

The **S&P 500 Index** is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. The index is adjusted for dividends, weighted towards stocks with large market capitalizations and represents approximately two-thirds of the total market value of all domestic common stocks. The **MSCI ACWI (All Country World Index) ex US** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the United States. The index includes reinvestment of dividends, net of foreign withholding taxes. The **MSCI ACWI (All Country World Index)** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets throughout the world. The index includes reinvestment of dividends, net foreign withholding taxes. The **S&P 500 Financials** is a capitalization-weighted index that tracks the companies in the financial sector as a subset of the **S&P 500 Index**. The **S&P 1500 Index** includes all stocks in the S&P 500, S&P MidCap 400, and S&P SmallCap 600. This index covers approximately 90% of U.S. market capitalization. Investments cannot be made directly in an index. Investments cannot be made directly in an index.

We gather our index data from a combination of reputable sources, including, but not limited to, Linner Wilshire and index websites.
