This report is authorized for use by existing shareholders. A current Davis Financial Portfolio prospectus must accompany or precede this material if it is distributed to prospective shareholders. You should carefully consider the Fund's investment objective, risks, charges, and expenses before investing. Read the prospectus carefully before you invest or send money.

Objective and Risks. Davis Financial Portfolio's investment objective is long-term growth of capital. There can be no assurance that the Fund will achieve its objective. Under normal circumstances the Fund invests at least 80% of its net assets, plus any borrowing for investment purposes, in securities issued by companies principally engaged in the financial services sector. Some important risks of an investment in the Fund are: stock market risk: stock markets have periods of rising prices and periods of falling prices, including sharp declines; manager risk: poor security selection may cause the Fund to underperform relevant benchmarks; common stock risk: an adverse event may have a negative impact on a company and could result in a decline in the price of its common stock; concentrated portfolio risk: a fund that has a concentrated portfolio is particularly vulnerable to the risks of its target sector; financial services risk: investing a significant portion of assets in the financial services sector may cause the Fund to be more sensitive to problems affecting financial companies; focused portfolio risk: investing in a limited number of companies causes changes in the value of a single security to have a more significant effect on the value of the Fund's total portfolio; foreign country risk: foreign companies may be subject to greater risk as foreign economies may not be as strong or diversified; emerging market risk: securities of issuers in emerging and developing markets may present risks not found in more mature markets; foreign currency risk: the change in value of a foreign currency against the U.S. dollar will result in a change in the U.S. dollar value of securities denominated in that foreign currency; trading markets and depositary receipts risk: depositary receipts involve higher expenses and may trade at a discount (or premium) to the underlying security; under \$10 billion market capitalization risk: small- and mid-size companies typically involve more risk than larger, more mature companies; interest rate sensitivity risk: interest rates may have a powerful influence on the value of fixed income securities; credit risk: financial institutions are often highly leveraged and may not be able to make timely payments of interest and principal; headline risk: the Fund may invest in a company when the company becomes the center of controversy. The company's stock may never recover or may become worthless; and fees and expenses risk: the Fund may not earn enough through income and capital appreciation to offset the operating expenses of the Fund.

The Portfolio generally uses Global Industry Classification Standard ("GICS") as developed by Morgan Stanley Capital International and Standard & Poor's Corporation to determine industry classification. GICS presents industry classification as a series of levels (i.e. sector, industry group, industry, and sub-industry). Allocations shown are at the Industry Group level except for the following industry groups which have been combined as indicated: Technology: Software & Services, Technology Hardware & Equipment, Semiconductors & Semiconductor Equipment; Pharmaceutical & Health Care: Pharmaceuticals, Biotechnology & Life Sciences, Health Care Equipment & Services. The Advisor may reclassify a company into an entirely different industry if it believes that the GICS classification for a specific company does not accurately describe the company. Industry Group weightings are subject to change.

Broker-dealers and other financial intermediaries may charge Davis Advisors substantial fees for selling its products and providing continuing support to clients and shareholders. For example, broker-dealers and other financial intermediaries may charge: sales commissions; distribution and service fees; and record-keeping fees. In addition, payments or reimbursements may be requested for: marketing support concerning Davis Advisors' products; placement on a list of offered products; access to sales meetings, sales representatives and management representatives; and participation in conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events, and other dealer-sponsored events. Financial advisors should not consider Davis Advisors' payment(s) to a financial intermediary as a basis for recommending Davis Advisors.

An investment in the Portfolio is not a deposit of any bank and is not insured or guaranteed by any bank, the Federal Deposit Insurance Corporation or any other government agency.
